25X1A 1. This information was given to [REDACTED] in Security, who is handling the problem. Subsequently, I called Norpel and thanked him for contacting us. I said the information he provided from his source corroborated information which we had received. While we had no interest in talking with his source, we would be interested in certain details if this information should come to his attention.

25X1C 25X1C 3.
